Mathematical Questions and Solutions in Continuation of the Mathematical Columns of The Educational Times Volume 51 (Paperback)

By Books Group

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1889 Excerpt: . This is the reciprocal of Question 8733--That if the 2m intersections of a conic and an --ic curve be joined two and two, the m right lines so determined will cut the m-ic again in m(m--2) points lying on an (m--2)-ic. Question 9513 follows when the conic consists of two coincident points and this introduces the idea of a curve which is the satellite of a point with respect to a given curve of class m. In the particular case of a class cubic, say a cuspidal cubic or tricuspidal qiiartic, it follows that, if three tangents be drawn from a point to the curve, the three tangents which can be drawn to the curve from the points of contact all pass through the same point. Similarly, if tangents be drawn from any point to a class quartic, nodal cubic say, the eight tangents which...
