Have you questioned the efficacy of clinical office visits versus home-based services for children and families? The outcomes of this research may help guide you in developing an understanding of the unique needs of families as they face the challenges inherent in caring for children with mental illness. The data reveals the need for services, not only for the child with mental illness, but for each individual in the family unit as well as the family as a whole. The Perceived Experiences Of Parents Who Have Received Intensive In-Home Services For Their Children may motivate you to think more deeply about understanding the dynamics of the family, collaborating with school administrators, and involving community resources.
